Aschaffenburg, 17 June 2026

Confirmation of meeting regulatory requirements regarding security awareness and sensitisation

As part of a project to review the learning content of the SoSafe Cyber Security E-Learning, the existing content has been reviewed and compared with the requirements of the following legal texts, standards and regulations:

ISO 27001, NIS2, DORA, GDPR, EU AI Act, TISAX 6, KRITIS, PCI-DSS, IEC 62443, ISO 27002, ISO 27701, CISIS12, VDS 10000, DIN SPEC 27076, DVO 2019/1583, NIST SP 800-53

After careful review, we can confirm that the SoSafe Cyber Security e-learning courses meet all the stated requirements and can play a crucial role in achieving compliance with the respective regulations.

Regular and ad-hoc training can be carried out and the content is customisable to incorporate organisation-specific requirements. Furthermore, the organisation's own content can be included.

Each organisation must check whether its individual requirements are fully met.
